

PENETRANTS • FUEL TREATMENTS • DEGREASERS • INDUSTRIAL LUBRICANTS • RUST SOLUTIONS

PROVEN PRODUCTS FOR THE **AGRICULTURE** **INDUSTRY**

Feeding the world is a massive endeavor, and the agriculture industry bears the lion's share of this load. According to the USDA, agriculture, food and related industries contribute roughly \$1.5 trillion to US gross domestic product (GDP), with America's farms contributing \$203.5 billion of this sum. One of the biggest threats to farm machinery and overall infrastructure is corrosion. The tractors, trucks and other equipment used on farms and ranches are typically made of heavy steel, and constantly exposed to the elements. And where there is that much metal, rust and corrosion will form. To avoid damaging effects, regular maintenance is key.

Agricultural service technicians and operators regularly use Kano products to assist in maintenance, repair and disassembly of various farm vehicles, machinery, equipment and tools, including:

- Trucks and tractors
- Combine harvesters
- Tillers and plows
- Balers and seeders
- ATVs and UTVs
- Nuts, bolts, conveyors, gears and more

WHO KNEW?

\$203.5 BILLION

Amount that America's farms contribute to the US GDP

1.89 MILLION

Number of working farms in the US, according to the USDA

4.2 MILLION

Approximate number of tractors on farms and ranches across the US

PROVEN PRODUCTS FOR THE AGRICULTURE INDUSTRY

Rust and corrosion are constantly present on farms and ranches, and can render expensive equipment useless, with far-reaching negative impact. That's why professional-grade products from Kano, the makers of Kroil, are regularly used by agricultural mechanics and operators. Kano products help save time, money and equipment when used for regular and preventative maintenance, repairs, disassembly projects and more.

Kroil Original Penetrant

When it comes to freeing corroded items in tough spaces, nothing rivals powerful, industry-proven Kroil penetrating oil. Kroil quickly loosens rusted nuts and bolts, frees frozen shafts and more. No space is too tight to reach, thanks to Kroil's ability to penetrate the smallest opening, thread or crevice. Corrosion meets its match, as Kroil helps remove and prevent rust, cleans and lubricates and displaces moisture.

SiliKroil Penetrant

SiliKroil has been engineered to loosen frozen metal parts and provide extra lubrication for long-lasting protection. The addition of silicone to the legendary Kroil formula results in superior penetration, lubrication and rust prevention. This high solvency oil first penetrates into the tightest of spaces to break the bond of rust, and then provides lubrication at the first molecular level, subsequently freeing virtually any metal part.

Penephte Penetrant

Penephte is a unique blend of oils, solvents and graphite engineered to penetrate the smallest gaps of corroded metals to loosen seized parts. The graphite is designed to stick to metal and provide long lasting lubrication, which will remain in place even in temperatures up to 700°F (371°C).

Floway Cleaner and Degreaser

Floway contains a powerful grease-cutting solvent that penetrates, dissolves and removes grease, tar, ink, asphalt, oil, dirt, crud, grime, carbon and gunk. It's excellent for cleaning greasy equipment, motors, machinery, parts, tools and more. It washes off easily and will not attack painted surfaces.

Exrust Rust Remover

Exrust penetrates and chemically reacts with rust to quickly remove it from all surfaces. It is effective on all ferrous metals without harming the base steel or iron*. After treatment, any type of finish can be applied.

*Do not use Exrust on non-ferrous metals.

Pyrolube High Temperature Lubricant

Pyrolube provides superior, long-lasting lubrication at temperatures up to 1359° F (700°C). It leaves a smooth, graphoid-lubricated surface, and will not drip or form abrasive particles. It also reduces wear by preventing metal-to-metal contact.

Microil Precision Lubricant

Microil lubricates bearings and mechanisms in precision instruments, gauges, meters, micrometers, counters, controls, light machinery and other small mechanisms. Its low viscosity, low evaporation formula lubricates to -50° F. It is non-corrosive, and will not gum.

Kreen All-In-One Gas & Oil Treatment

Kreen is used to help keep fleet vehicles of all kinds running smoothly. It dissolves sludge, gum and varnish in gas and diesel engines, and softens and removes excess carbon from around valve stems and piston grooves. It also thoroughly cleans the entire crankcase, injectors and oil lines.
